DISCHARGE SUMMARY

Name: Safwan Mondal

Patient UID: 0001

Age: 45

Admission Date: 2025-03-01

Gender: Male

Discharge Date: 2025-03-07

Address: Not Provided

Status: Discharged

Summary:

****Discharge Summary****

Patient Name: Safwan Mondal

Patient ID: 0001

Date of Admission: March 1, 2025

Date of Discharge: March 7, 2025

****Chief Diagnosis:****

The patient, a 45-year-old male, was admitted to our hospital with a primary diagnosis of Pneumonia.

****Treatment and Course:****

During the hospital stay, the patient received antibiotic therapy, which he responded well to, as per the doctor's notes. No complications were reported throughout the treatment course.

****Procedures and Tests:****

The patient underwent a Chest X-Ray and a Blood Test as part of the diagnostic workup. The test results revealed a normal Complete Blood Count (CBC), and the Chest X-Ray showed improvement.

****Medications:****

The patient was prescribed Azithromycin and Paracetamol during the hospital stay.

****Vital Signs at Discharge:****

At the time of discharge, the patient's vital signs were stable, with a Blood Pressure of 120/80 mmHg, a Pulse rate of 76 beats per minute, and a Temperature of 98.6°F.

****Discharge Status:****

The patient has been discharged in a stable condition, with resolution of the primary diagnosis. He has been advised to follow up with his primary care physician for further management and monitoring.

****Additional Notes:****

As per the doctor's notes, the patient responded well to treatment, and no complications were reported during the hospital stay.
